Subject: Ergon - Corpus Christi

Ed:

Sorry for the delay. I blame vacations and distractions. Poor excuses, I know. We revised the letter to reflect the facts we presented during our meeting and in Ergon's 104(e) response. The attached pdf is a redline that includes footnotes explaining the revisions; the attached WORD document is just an "accept all changes" and eliminate footnotes in the pdf. We did **NOT** change the date on your letter, or remove your signature but I placed a **BIG HEADER** on every page so it is clear that the letter was not sent June 15 under your signature in the form it is now in.

With respect to the potential influence of the new pump at the Ergon's Corpus Christi facility, prior to April 2016, Ergon used a 60 psi pump at its mill. In April, 2016, Ergon replaced the 60 psi pump with a 90 psi pump. That new pump was in operation for more than 6 months (April-November) with no reported incidents of concern. Products that used Indulin AA-86 as the surfactant in the soap solution were manufactured at some point during that 6 month period.

Please call me or Scott if you have any questions about Ergon's operations, the attached edits, or anything related to this matter.

Best,

Molly
